DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 12-13, 15, 17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Sanchez [US 5, 393,604].

Sanchez discloses a conductive magnetic green tape and its composition for use in electronic device, the composition comprising:

- an organic binder including acrylic copolymer;
- an inorganic component including boron; and
- a polyhydroxy alcohol including polyethylene glycol.

Regarding claims 6-7, Sanchez discloses the alcohol is a liquid at room temperature and present in a ratio of from about 0.1 to 20 parts/percents by weight per part of the inorganic component.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2832

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16, 18 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sanchez.

Sanchez discloses the instant claimed invention except for via hole disposed in the conductive magnetic layer.

The specific via hole structure would have been an obvious design consideration for the purpose of providing connections between the conductive patterns.

Allowable Subject Matter

Claims 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T NGUYEN whose telephone number is 703-308-0821. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 703-308-7619. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
